

Mind Control and Technological Torture: “Havana Syndrome”
Conference, Bologna, Italy, 5 September 2026
Peter Mooring – STOPEG Foundation

Hello dear people, friends,

[Unfortunately I do not speak Italian ... so I do this in English.
Thank you very much Paolo and the team for doing this conference. From personal
experience I know it is very much work ...
I hope you are having a good time here in Bologna.]

I am Peter from the Netherlands. I am a Targeted Individual for more than 25 years. In 2007
I started STOPEG Foundation to get more attention for our problem.

The people here today may not be your friends, but they certainly are your family. We all
share the pain, we all share the symptoms of these often horrific attacks.

Last week I posted on x.com the following text:

“Every day innocent civilians are attacked, tortured and experimented on, with Directed
Energy Weapons and Neuro Weapons, many 24/7. Every day suffering, every day pain.
Every day, every day, every day ... “

Yes, these are crimes against humanity. Our lives are disrupted, destroyed, some of us are
murdered, some of us commit suicide. It's inhumane, it's insane.

It's now 2026 and ALL the methods that are used against us have been exposed.

But all Western governments stay silent - and the reason is of course that they are all
complicit. They know exactly what is going on, they know of our suffering, they know that
everything they do is against the law - And violates the human rights treaties and
conventions against torture they ratified.

For more than 30 years they have suppressed information about this, and now with the
internet, everything is slowly being exposed.

I want to say a few words about why WE are targeted? Why are they doing this to US? And
why don't they STOP after some time.

The reason is that we live in a mind controlled society, it's called 'Western democracy'. All
our data is collected in real-time and used to manipulate our lives. This is what MK-Ultra
was about - And today this is present in all aspects of our lives. MK-Ultra evolved from
controlling some individuals - to controlling everyone.

To develop their mind control programs, their mind control weapons, their algorithms and
AI ... in short ... **to develop their Cognitive Warfare systems**, they need people,
opposition. This way they create learning data for their computers.

So they select 'almost random' persons. Why random? Because they need all kinds of people.

They torture them, they experiment on them, they make them struggle and suffer. And they record all their responses - and feed this to their computers.

With all the data they collect from us, they optimize their algorithms and use this to attack other people they don't like - Other people they want to manipulate, coerce, stop and punish. Mind control for everyone. And Directed Energy Weapons and Neuro Weapons (frequency weapons) are very important tools here.

So, we are the test subjects, the guinea pigs, the human experiments, used to develop programs to control everyone. To them, we are assets, we are being used to create **a horrific mind controlled future** where there will be no free will, no privacy of thoughts. Where everyone is remotely connected to computers.

In short, what they are doing is creating a MIND PRISON FOR EVERYONE. And it's happening today.

That's what they are up to. That's what they want.
But this is not what we want - We cannot let this happen.

Today we are at a crucial moment in history. The information is out there – I know that more and more people are starting to understand - that Targeted Individuals are not some group of 'crazy' people - but that we are a sign of things that are coming to EVERYONE ... not in 10 years time but today.

For ourselves and the children of our world, we must fight this, we must keep exposing the truth, we must put this information on websites, we must keep writing letters. And we must make posts about this on social media - And organize meetings and conferences.

If we can stop the Targeted Individuals program we may also be saving the world.

This is what I wanted to tell you.

Keep strong and never give up. If you can, be an activist. And remember, you are not alone, there are many of us. Support each other, we are family.

Finally, I know Paolo for more than 10 years now and he is the best. Please support Paolo Dorigo and his organization.

I wish you all a good continuation of the conference.
Thank you.

Peter
